

Class R
Weekly Learning Plan
15th June 2020

Well done everyone this week. I have loved seeing your work. I have seen some super bug hotels together with some very interesting new residents. I also love all your butterfly life cycle drawings.

We are continuing our minibeast topic. This week we have our story theme is '**The Cautious Caterpillar**'. This is a super e-book available on the Twinkl website.

Below is a brief outline of the weekly activities based on this story. Full details of daily lessons, suggested activities and links to 'The Cautious Caterpillar' resources will appear on Tapestry by 8am daily. I can be contacted as usual via this app and will respond to any questions and comments.

	Reading/ writing/ phonics	Maths	Topic
Monday	Recap tricky words Recap of split diagraphs o..e and i...e Cautious caterpillar Ebook	Addition and subtraction problems	Minibeast arts and crafts
Tuesday	o_e i_e split diagraphs Handwriting practise Reading story captions	Addition and subtraction problems	Minibeast facts research
Wednesday	ay letter sound as a word ending The Cautious Caterpillar story games	The Cautious Caterpillar mosaics with addition facts	RE lesson
Thursday	Tricky words ay words and sentences	The Cautious Caterpillar mosaics with addition facts	Minibeast topic work
Friday	Tricky words Handwriting Writing story captions	Minibeast sorting and classifying in a tally and bar chart	Minibeast topic work

PE activity idea

Dice game

You will need a dice. A small dice would be fine. But if you would like to make a large dice with your child then there are some links to templates below. You will need paper, scissors and glue. To strengthen the dice you could stick the paper template on to cardboard (a cereal box would work well!) This will be a great activity for your child to practise their fine motor skills, cutting out the template with scissors and to practise listening to and following instructions. They could even cover and decorate a small cardboard cube if you have a tissue box or something of a similar size in your recycling. They can choose to add dots or

numbers to the dice. If you want your child to practise number recognition you could ask them to write numbers, for example if they are struggling with the teen numbers they could write 13,14,15,16,17, and 18 on the 6 sides.

<https://team-cartwright.com/how-to-make-paper-dice/>

Once you have a dice, then you will need to write out a menu of exercises with your child. Example below;

If you roll a...

1. Do 10 star jumps
2. Run up and down the stairs 5 times
3. Hop round the garden twice
4. Balance on one foot for 10 seconds
5. Do 10 squats
6. Balance a ball on a bat for 20 seconds while walking backwards

These are just examples, you and your child can think of your own ideas! Then, to play the game, take it in turns to roll the dice and whoever is taking part joins in with the actions. Once they have completed each of the actions they could create a new menu with different exercises. Have Fun!
